Version: 1.0
Revision Date: 09/01/26

SAFETY DATA SHEET

1. Identification

Product identifier: MC Salon Goods Charcoal Detox Shampoo 16oz

Other means of identification: N/A

Recommended Use: Rinse-out hair shampoo / cosmetic hair-care product.

Recommended restrictions

Restrictions on use:

Use only as directed. Avoid contact with eyes.
For external use only.

Manufacturer/Importer/Distributor Information
Company Name: Marlo Beauty Supply 23950
Address: Mound Rd Suite 100
Warren, MI 48091
Telephone: 1-800-333-9499

Emergency telephone number: For all emergencies, call Chem Tel (24 Hours / 7 Days): 1-800-255-3924

2. Hazard(s) identification

Hazard Classification: Not classified as hazardous under the OSHA Hazard Communication Standard, 29 CFR 1910.1200, based on the supplied finished-product formulation and available component information.

Physical Hazards: None.
Pictograms: None required.

Signal Word: None required.

Hazard Statement: None required.

Precautionary Statements: Avoid contact with eyes. Use only as directed.

Percent of mixture consisting of ingredients(s) of unknown toxicity: None known based on available information.

Other Hazards: Direct eye contact may cause temporary irritation. Prolonged or repeated skin contact may cause irritation in sensitive individuals. Fragrance-sensitive individuals may experience irritation.

3. Composition / information on ingredients

Chemical Identity (INCI)	CAS number	Content in percent (%) *

Water (Aqua)	7732-18-5	>50
Cocamidopropyl Betaine	61789-40-0	5 - 10
Disodium Laureth Sulfosuccinate	39354-45-5	5 - 10
Sodium Cocoyl Isethionate	61789-32-0	1 - 5
Cocamidopropyl Hydroxysultaine	68139-30-0	1 - 5
Decyl Glucoside	58846-77-8	1 - 5
Cocamide MIPA	68333-82-4	1 - 5
Disodium Lauryl Sulfosuccinate	36409-57-1	1 - 5
Polyquaternium-7	26590-05-6	1 - 5
Panthenol	16485-10-2	.1 - 1
Sodium Hydroxide	1310-73-2	.1 - 1
Hydrolyzed Rice Protein	156715-40-1	.1 - 1
Disodium EDTA	139-33-3	.1 - 1
Hydrolyzed Quinoa Protein	227025-12-9	.1 - 1
Charcoal Powder	7440-44-0	.1 - 1
Phenoxyethanol	122-99-6	.01 - .1
Caprylyl Glycol	1117-86-8	.01 - .1
Potassium Sorbate	24634-61-5	.01 - .1
Hexylene Glycol	107-41-5	.01 - .1
Fragrance (Parfum)	N/A	.01 - .1
Citric Acid	77-92-9	.001 - .01
Carbon Black (CI 77266)	1333-86-4	.001 - .01

Concentration ranges are provided where applicable. Certain exact concentrations may be withheld as confidential business information where permitted by applicable regulations.

Description of necessary first-aid measures

4. First-aid measures

Inhalation: Not expected to present an inhalation hazard during normal use. If discomfort occurs from mist or heated vapors, move the affected person to fresh air. Seek medical attention if symptoms persist.

Skin Contact: Rinse affected area with water. Discontinue use if irritation develops. Obtain medical advice if irritation persists.

Eye Contact: Rinse cautiously with clean water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Obtain medical advice if irritation persists.

Ingestion: Rinse mouth. Do not induce vomiting unless directed by medical personnel. If a significant amount is swallowed or symptoms occur, contact a physician or poison control center.

5. Fire-fighting measures

Suitable Extinguishing Media: Use extinguishing media appropriate for the surrounding fire, including water spray, dry chemical, carbon dioxide, or foam.

Specific Hazards:	The finished product is a water-based cosmetic cleansing formulation and is not expected to be flammable under normal conditions of use. Containers exposed to fire may rupture from heat. Thermal decomposition may generate carbon oxides and irritating fumes.
Protective Equipment for Firefighters:	Firefighters should wear self-contained breathing apparatus and full protective clothing when appropriate.
Flash Point:	Not determined / Not applicable to normal product use.
Explosive Limits:	Not applicable.

6. Accidental release measures

Accidental Release Measures:	Use normal hygiene practices. Avoid eye contact and unnecessary skin contact. Contain spill. Product may make floors very slippery. Absorb with inert material or collect mechanically. Wash residual film with water and suitable detergent. Prevent large quantities from entering drains, surface water, or soil. Dispose of collected material according to applicable local requirements.

7. Handling and storage

Handling:	Use as intended. Avoid eye contact and ingestion. Keep containers closed when not in use. Maintain good housekeeping around filling and storage areas.
Storage:	Store in a cool, dry, well-ventilated area away from excessive heat, freezing conditions, and direct sunlight. Keep container tightly closed. Protect from contamination.
Storage Temperature:	Store at normal room temperature. Protect from freezing and excessive heat.
Incompatible materials:	Strong oxidizing agents.

8. Exposure controls / personal protection

Exposure Limits:	No mixture-specific OSHA permissible exposure limit has been established. Refer to supplier SDSs for applicable exposure limits for individual raw materials during manufacturing.
Engineering Controls:	General ventilation is adequate for normal handling and filling operations.
Eye / Face Protection:	Not normally required for intended consumer use. Safety glasses or splash goggles are recommended during bulk manufacturing, filling, or spill cleanup where splashing may occur.
Skin Protection:	Not normally required for intended consumer use. Suitable protective gloves are recommended during prolonged bulk handling or spill cleanup.
Respiratory Protection:	Not normally required under normal conditions of use. Use appropriate respiratory protection if mist or vapor concentrations are generated during abnormal processing conditions.

9. Physical and chemical properties

Appearance	Viscous liquid / liquid cleanser.
Form:	Liquid.

Color:	Black
Odor:	Fragranced; characteristic cosmetic odor.
pH Value:	5.5 – 6.0
Melting/Freezing point:	N/A
Boiling Point:	N/A
Flammability:	Not expected to be flammable under normal conditions.
Flash Point:	N/A
Explosive limit - upper (%):	N/A
Explosive limit - lower (%):	N/A
Vapor pressure / density:	N/A
Relative density / specific gravity:	N/A
Solubility:	Dispersible in water.
Partition coefficient:	N/A
Auto-ignition temperature:	N/A

10. Stability and reactivity

Reactivity:	No dangerous reaction expected under normal conditions of storage and use.
Chemical Stability:	Material is stable under normal conditions.
Possibility of hazardous reactions:	Hazardous polymerization is not expected.
Conditions to avoid:	Excessive heat, freezing, contamination, and prolonged direct sunlight.
Incompatible Materials:	Strong oxidizing agents.
Hazardous Decomposition Products:	Under fire conditions: carbon oxides and irritating decomposition products may be generated.

11. Toxicological information

Information on likely routes of exposure: Eye contact, skin contact, ingestion; inhalation exposure is unlikely during normal use.

Acute toxicity:	The finished mixture is not expected to be acutely toxic under normal and reasonably foreseeable use based on the supplied formulation and low concentrations of potentially hazardous components.
Skin corrosion / Irritation:	Not classified. Prolonged or repeated contact may cause mild irritation or dryness in sensitive individuals, particularly with extended exposure to concentrated product.

Respiratory / skin sensitization:	Not classified based on available information. Fragrance components may cause sensitivity in susceptible individuals.
Carcinogenicity:	No mixture-specific carcinogenic classification identified from the information supplied.
Mutagenicity / reproductive toxicity:	No mixture-specific classification identified from the information supplied.
STOT / aspiration Hazard:	Not classified based on available information.
Serious eye damage / irritation:	Not classified based on available finished-product information. Due to the surfactant content typical of rinse-off shampoo products, direct eye contact may cause temporary stinging, redness, watering, or discomfort.
Symptoms:	Temporary eye stinging, redness, watering, or discomfort may occur following direct contact. Prolonged contact with concentrated product may cause mild skin dryness or irritation in sensitive individuals.

12. Ecological information

Ecotoxicity, persistence and degradability, bioaccumulative potential, and mobility have not been determined for the finished mixture. Avoid unnecessary release of concentrated bulk product to the environment.
This product contains surfactants used in rinse-off cleansing products. While the finished shampoo is diluted during normal use and rinsed with water, concentrated bulk product should not be discharged directly into surface waters, storm drains, or soil. Certain surfactant raw materials may be harmful to aquatic organisms at higher concentrations.

13. Disposal considerations

Dispose of product, residues, and contaminated packaging in accordance with applicable federal, state, and local requirements. Do not discharge large quantities of concentrated product into drains or surface waters. Recycle packaging where appropriate and permitted.

14. Transport information

U.S. DOT:	Not regulated as a hazardous material based on available information.
IATA:	Not regulated as dangerous goods based on available information.
IMDG:	Not regulated as dangerous goods based on available information.
UN Number:	Not applicable.
UN Proper Shipping Name:	Not applicable.
Transport Hazard Class:	Not applicable.
Packing Group:	Not applicable.

15. Regulatory information

Prepared in the 16-section format prescribed by OSHA Hazard Communication Standard (29 CFR 1910.1200, Appendix D). Cosmetic products may be subject to additional FDA cosmetic requirements when marketed for consumer use. This SDS is intended primarily for workplace handling, manufacturing, warehousing, and transportation communication.

16.Other information, including date of preparation or last revision

Issue Date:	09/01/26
Revision Information:	No data available.
Version #:	1.0
Further Information:	No data available.
Disclaimer:	This information is provided without warranty. The data provided is believed to be correct and the recommended industrial hygiene and safe handling procedures are believed to be generally applicable. These recommendations should be reviewed in the specific context of their intended use to make an independent determination of the methods to protect workers and the environment.
